

**1. Joseph J. Vallino, Ph.D.**

Senior Scientist, The Ecosystems Center, Marine Biological Laboratory  
jvallino@mbi.edu  
<http://eco37.mbl.edu>  
508-289-7648

**2. Education**

*University of California, Berkeley, CA*

B.S. Chemical Engineering, June 1983.

*California Institute of Technology, Pasadena, CA*

M.S. Chemical Engineering, June 1985. Advisor: Prof. Gregory Stephanopoulos.

Thesis: On-Line Estimation of the Oxygen-Mass-Transfer Coefficient and Other State Variables in a Chemostat.

*Massachusetts Institute of Technology, Cambridge, MA*

Ph.D. Chemical Engineering, February 1991. Advisor: Prof. Gregory Stephanopoulos.

Thesis: Identification of Branch-Point Restrictions in Microbial Metabolism Through Metabolic Flux Analysis and Local Network Perturbations.

**3. Professional appointments**

*California Institute of Technology, Pasadena, CA*

Research Assistantships, August 1983 - June 1985

*Massachusetts Institute of Technology, Cambridge, MA*

Research and Teaching Assistantships, August 1985 - February 1991

*Scripps Institution of Oceanography, UCSD, La Jolla, CA*

Mellon Postdoctoral Fellow, February 1991-1993

*Marine Biological Laboratory, Woods Hole, MA*

Lakian Postdoctoral Scholar, July 1993 – 1995

Postdoctoral Scholar, August 1995 – January 1997

Research Associate, January 1997 – May 1997

Assistant Scientist, June 1997 – August 2005

Associate Scientist, August 2005 – Dec 2011

Senior Scientist, Dec 2011 – Present

*Brown University, Providence, RI*

Adjunct Assistant Professor (MBL), Ecology and Evolutionary Biology, 2004-2010

Assistant Professor (MBL), Geological Sciences, 2010-2013

**4. Completed publications**

*a. Refereed journal articles*

## 5. Research Grants

### a. Current grants

- NSF-DEB-1841599, EAGER SitS: Developing a Next Generation Modeling Approach for Predicting Microbial Processes in Soil, Jan 2019-Dec 2020, **Lead PI**, \$300,000.
- NSF-OCE-1558710, Collaborative Research: Predicting the Spatiotemporal Distribution of Metabolic Function in the Global Ocean, Apr 2016-Feb 2020, **Lead PI**, \$687,302.
- NSF-OCE-1637630, LTER-Plum Island Ecosystems: Dynamics of coastal ecosystems in a region of rapid climate change, sea-level rise, and human impacts, Oct 2016-Sep 2022, **Co-PI**, \$6,761,476.
- NSF-DEB-1655552, Investigating the connectivity of microbial food webs using thermodynamic models, stable isotope probing and genomics, Aug 2017-Jul 2020, **Lead PI**, \$645,576.
- Simons Foundation-CBIOMES 549941, Thermodynamically Constrained Metabolic Networks for Ocean Modeling, Jul 2017-Jun 2022, **Lead-PI**, \$993,229.

### b. Completed grants

- NSF-DEB-9726862, W/WS: Integrated, Ecological-Economic Modeling of Watersheds and Estuaries at Multiple Scales, Oct 1997-Sep 2002, **Co-PI**, \$815,000.
- NSF-OCE-9726921. LTER: Plum Island Sound Comparative Ecosystem Study (Pisces) Effects of Changing land Cover, Climate and Sea Level on Estuarine Trophic Dynamics, Jul 1998-Jun 2004, **Co-PI**, \$4,646,609.
- NSF-EAR-9807632, (EGB) Predictions of Bioavailability of Riverine Dissolved Organic Matter from Bulk Measures of Geochemical Composition Across Landscape and Continental Gradients, Oct 1998-Sep 2000, **Co-PI**, \$259,483.
- NSF-DEB-9815598. Ecosystem Controls on the Biogeochemical Processing of Watershed-Derived Nitrogen in Tidal Rivers, Sep 1999-Aug 2002, **Co-PI**, \$823,000.
- NSF-EAR-0083839, BIOCOMPLEXITY – INCUBATION ACTIVITY: Quantitative Description of The Response of a Complex System to Disturbance: Subsurface Microbial Communities and Chemical Contaminants, Oct 2000-Mar 2003, **Co-PI**, \$67,211.
- NSF-OPP-9911278, Aquatic Ecosystem Responses to Changes in the Environment of an Arctic Drainage Basin, Jul 2000-Jun 2005, **Co-PI**, \$3,257,870.
- NSF-DEB-0213767, Trophic Cascades and Interacting Control Processes in a Detritus-Based Aquatic Ecosystem, Oct 2002-Sep 2006, **Co-PI**, \$2,699,971.

- NSF-0301231, Controlled Environment Facilities for Examination of the Effects of Climate Change and Human Land Use on Terrestrial and Aquatic Ecosystems. (Equipment Grant), Jul 2003-Jun 2005, **Co-PI**, \$240,000 plus \$120,000 MBL cost share.

- NOAA/WHOI Sea Grant: The impacts of increased nitrogen loadings on decomposition in salt marshes: Does eutrophication enhance marsh accretion or erosion? May 2014-Apr 2016, **Co-PI**, \$119,998 (plus \$ 62,360 matching).
- Anonymous Donor: Continuous production of methane from algae lacking cell walls. Oct 2014 – Sep 2016, **Co-PI**, \$360,000.
- NSF-GEO-1451356: Application of thermodynamic theory for predicting microbial biogeochemistry, Apr 2015-Apr 2016, **Lead PI**, \$203,658.
- DOE-EMSL-JGI-49028: 3D Reality Check: Developing Structural Support for Predicting Microbial Function and Interpreting Microbial "Omics" Data, Jul 2015-Jun 2016, **Co-PI**, JGI Genomic and transcriptomic sequencing of *Methanosarcina barkeri str. Fusaro*.

c. *Proposals submitted*

- DOE, 3D Structural Support for Scaling Distributed Microbial Metabolic Activity Belowground: a Test Case in Net Methanogenesis, **Co-PI**, \$394,333.

NSF-OCE, Collaborative Research: Linking Organic Matter Composition to Shifting Baselines in the Coastal Sedimentary Nitrogen Cycle, **Co-PI**, \$1,081,263.

EPA, Application of Permeable Reactive Barrier Technology to remediation of residual nitrate in treated wastewater, **Co-PI**, \$282,108.

DOE, Systems biology of microbial consortia involved in biogeochemical cycling: Identifying functional linkages in salt marsh sediments by studying cultivar consortia with integrated genomics, modeling and imaging, **Co-PI**, \$3,714,234.

DOE, Biopolymer degradation in arctic soils: A stable-isotope multi-omics approach revealing active microbial populations, metabolic niches and expressed pathways at high resolution, **Co-PI**, \$2,987,255.

## 6. Service

### a. *To the MBL*

Fellowships and Research Awards Committee, Jan 2006-Dec 2008

Bay Paul Center, Assistant Scientist search committee, Nov 2006

Director's Counsel, Mar 2015 – Mar 2017

MBL IT Advisory Committee, Aug 2015 – Present

Search Committees: Assistant Scientist MBL, Jan 2018; Hibbitt Fellow, Feb 2018; Assistant Scientist MBL, Mar 2019.

### b. *To the university (Brown)*

Research Committee for Brown/IBM High Performance Computing Center, March-October 2009.

Energy/Environment Working Group, Office of the Vice President for Research, December 2009.

### c. *To the university (Chicago)*

Served on the Planning Committee for the MBL and UChicago May 2014 retreat.

Coastal Nitrogen Synthesis Charette, Sep 2014.

Microbiome Center Collaboratorium, Jun 2016.

### d. *To the profession*

NATO Science of Stability Program: Advisory committee for the TU-Black Sea Project, 1994 - 1995.

NSF JGOFS-Southern Ocean Modeling panel member, 1995.

Editorial Board, *Mangroves and Salt Marshes*, 1998 - 1999.

EPA Water and Watersheds Program panel member, 1999.

Editorial Board, *Wetlands Ecology and Management*. 1999 - 2001.

NSF Biocomplexity Math/Theory/Computation panel member, 2000.

NOAA Coastal Hypoxia Research Program panel member, 2005.

NSF Ecosystems Cluster panel member, 2006.

LTER Site Review Committee, Dry Valleys, Antarctica. Jan 2008.

*Nature* Reader Panel. 2008 - 2009.

Review Editor, *Aquatic Microbial Ecology*. 2007 - Present.

NSF Advancing Theory in Biology panel member, 2010 and 2011.

NSF Center for Coastal Margin Observation and Prediction site review committee, 2012.

DOE SBR SFA review panel, 2018.

Session Chair/Organizer for:

*Novel Approaches to Modeling Food Web and Ecosystem Biogeochemistry*, ASLO, Salt Lake City, UT, Feb 2003.

*Ecology and Population Biology*, MBL General Scientific Meeting, Woods Hole, Aug 2003.

*Understanding and Modeling Aquatic Ecosystems Using Fundamental Laws*, ASLO, Santa Fe, NM, Feb 2007.

Reviewed numerous proposals for: NSF, NOAA, UNH CICEET, EPA, DOE, Sea Grant, and Hudson River Foundation.

Reviewed manuscripts for: *American naturalist*, *Aquatic Microbial Ecology*, *Biogeochemistry*, *Biological Bulletin*, *Biotechnology & Bioengineering*, *Biotechnology Progress*, *Deep-Sea Research*, *Ecological Applications*, *Ecological Modelling*, *Ecological Monographs*, *Ecosphere*, *Ecosystems*, *Entropy*, *Environmental Microbiology*, *Environmental Modeling Software*, *Estuaries*, *Estuarine Coastal and Shelf Science*, *Frontiers in Microbiology*, *Geology*, *Global Biogeochemical Cycles*, *Journal of Geophysical Research*, *JGR Biogeosciences*, *Journal of Marine Research*, *Journal of Marine Systems*, *Limnology and Oceanography*, *L&O Methods*, *Marine Ecology Process Series*, *Microbiology*, *Oceanography*, *PeerJ*, *Philosophical Transactions of the Royal Society B: Biological Sciences*, *Proceedings of the National Academy of Sciences*, *Processes*.

Organizations: Society for Mathematical Biology, American Geophysical Union; American Society of Limnology and Oceanography, Coastal and Estuarine Research Federation.

*e. To the community*

WGBH interview for *Fresh Water, Salt Water – Part III – Simple Solutions*. Use of permeable reactive barriers for groundwater bioremediation.

## 7. Academic honors, fellowships, honorary societies

Outstanding Sophomore Award, American Institute of Chemical Engineers, UCLA. 1981.

Northern California Section Award for AIChE. 1983.

Corning Glass Fellowship, Caltech. 1983-1984.

Mellon Postdoctoral Fellowship Award at Scripps Institution of Oceanography. 1991-1993.

Lakian Postdoctoral Scholar Award at Marine Biological Laboratory, 1993-1994.

Vallino and Stephanopoulos (1993) selected as one of the top 20 papers of special significance over the last 40 years of publication in *Biotechnology & Bioengineering*. 2000.

## 8. Teaching

*a. Marine Biological Laboratory, Woods Hole, MA*

Semester in Environmental Science Program (see <http://www.mbl.edu/SES>)

*Course Instructor*, Microbial Methods in Ecology (fall 1999-present): Undergraduate course combines lectures on microbial biogeochemistry and ecology with laboratory methods.

Lectures and labs on bacterial counts, leucine-<sup>14</sup>C bacterial productivity, hydrogen sulfide and methane production in Winogradsky columns, extracellular enzyme assays, bacterial grazers, bacteria-phytoplankton competition, and PCR (see <http://ecosystems.mbl.edu/SES/MicrobialMethods>).

*SES Undergraduate Research Projects and REU's, Advisor to (last 5 years only):*

Chelsea Westra (2013) Effects of carbon source and particle size on nitrogen cycling in aggregated "Bio-Floc" microbial communities.

Kelsey Gosselin (2013) Aerobic and anaerobic microbial degradation of weathered and fresh oil from the BP Deepwater Horizon Oil Spill.

- Leah Hayden (2013) Effects of ocean acidification and nutrient enrichment on growth of the planktonic coccolithophore *Emiliana huxleyi*.
- Ruby An (2015) A2M: Experimental and modeling approaches to optimize an algae-to-methane coupled bioreactor system. (U. of Chicago, Metcalf).
- Petra Byl (2015) Assessing Microbial Coordination over Space and Time in Siders Pond. (U. of Chicago, Metcalf).
- Jessie Yang (2015) Effect of microbial fuel cells on nitrogen removal processes in wastewater organic matter.
- Gabriela Atsepoyi (2015) Comparison of microbial respiration between heated and control plots in the Harvard Forest soil warming experiment.
- Emily Geoghegan (2015) Understanding decomposition of organic matter in anaerobic environments: improving breakdown of algal mass in A2M methanogenic bioreactor.
- Emily Okikawa (2015) The importance of microbial mats versus "pink berries" in altering nutrient cycles between sediments and the water column in Little Sippewissett marsh.
- Petra Byl (2016) Assessing microbial metabolic function and circadian rhythms over time and space in Siders Pond (U. of Chicago, Metcalf).
- Catherine Ballali, Earlham College (2016) Can a microbial fuel cell be used to harness electricity from algal biomass?
- Olivia Bispos, Earlham College (2016) Ocean Acidification and its effect on Phytoplankton growth.
- Rachel Clifford, Franklin & Marshall College (2016) Importance of Structure to Function and Productivity of Pink Berry Bacterial Consortium.
- Emi Lemberg, University of Chicago (2017) Microbial Fuel Cells for Improved Bioremediation.
- Sarah Pope, Wheaton College (2017) FISHing for sulfate reducing microbes in Siders Pond, a meromictic lake.
- Wenzhuo Yang, Allegheny College (2018) Are Microbial Community Inherently Unstable?
- Rohan Guha, University of Chicago (2019) Anaerobic salt marsh microbial consortia remain stable over time when exposed to high nitrate concentrations (Metcalf Student).

*Thesis Committees*

- Jennifer Bowen. Boston University, Ph.D. Program, 2002-2007.
- Yawei Luo. Brown University, Ph.D. Program, 2007-2009.
- Sara Schloth, UMass Lowell, M.S. Program, 2010-2012
- Angus Angermeyer, Brown University, Ph.D. Program, 2014-2017.

*Postdoctoral Students Mentored*

- Zhenwen Wan (2002-2004)
- Lora Harris (2005-2007)
- Liuzhi Zhao (2006-2009)
- Nuria Fernandez-Gonzalez (2010-2014)
- Chris Algar (2010-2014)
- Aboozar Tabataba (2017-2019)
- Ashley Bulseco-McKim (2018-Present)
- Ioannis Tsakalakis (2019-Present)

b. *Brown University, Providence, RI*

- Co-instructor, Geomicrobiology (GEOL1950F), fall 2011. Course examined the influence of microbes in geological and environmental processes by integrating molecular, microbiological, and modeling approaches.
